DETAILED ACTION

Election/Restrictions

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1, 15, 52 and 62 are generic.

This application contains claims directed to the following patentably distinct species of the claimed invention: the species are water treated with ultra violet, ozone or heat and particular flavorants as in claim 5. Species I includes claims 1-11, species ultraviolet light and claims 15, 24, 28-33, 42 and 50 and method claim 52, and claims 62-69. Also, applicants may pick an additional flavorant from the Markush grouping of claim 5.

Species 2 includes claims 1-11 and 12 (ozone), and claims 36 to 41 and 51 and claims 15 and 25 and claims 28 and 34, plus method claims 52 and all claims that depend on the above, except the particular species. Also, applicants may pick an additional flavorant from the Markush grouping of claim 5.

Species 3 contains claims 1-11, and 13 (heat) and claims 15, 26, 35, plus all claims that depend on claims 1 and 15, and 43, 44-49, plus method claim 52 and all claims that depend on the above, except the particular species. Also, applicants may pick an additional flavorant from the Markush grouping of claim 5. All dependent claims go with the above except for any ones to treating water with ultra violet and heat.

Art Unit: 1761

As to the method species claim 58, ultra violet, claim 59, ozone and claim 60, heat, Applicants may choose one of the method species to go with the method. Each species for the method must go with the corresponding system claim.

Claims 62-69 can go with any group of species.

A telephone call was not made to request an oral election to the above restriction requirement because the restriction was too complicated.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 1761

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen F. Pratt whose telephone number is 571-272-1404. The examiner can normally be reached on Monday-Friday, 9:30-6:00 P. M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
